“ I have used spell casting to get my ex husband back to me and also get pregnant with twins girls through the help of a great and trusted spell caster after 12 years of marriage.

When I came online last year, I met a testimony about Doctor ODUNGA who has been helping people and I decided to contact him. We spoke on email at (odungaspelltemple@gmail.com) and later he gave me his Whats App number which is +2348167159012 and he assured me he would help me get my ex husband back after 3 years of no contact. My husband left me because I was unable to give him a child for 9 years after our marriage. There was no contact between us anymore and I didn't know how to get to him. Doctor Odunga is the best spell caster I must say. My husband called me after 24 hours of contacting Dr. Odunga. Soon I received a herbal medicine for fertility from this man, I became fertile. I and my husband reconnected that very week, had sex and I became pregnant. Today, I am happy today to be the mother of twins girls and this is ALL THANKS TO DOCTOR ODUNGA. I came online to say this If you need help, I believe you are saved with this spell caster. Contact his email at (odungaspelltemple@gmail.com) and you too will give a testimony too to help others

“ I too was a Dr Peter Nardi resident many years ago. He was a very smart man and an excellent but tough teacher. His dry sense of humor was often funny !! My mother used to make him sweet potato pies that he just loved. When I would come in with one of her pies on a Monday..... he would just smile....and I would have a less stressful day !!!

He will be missed, prayers and best wishes to Dr. Lisa and the entire Nardi family

“ We could not have asked for a better neighbor than Peter. My fondest memories will be of him sitting on our stoop with Bob and Marshall solving the problems of the world.

Our thoughts and prayers are with Lisa, Ali, Jake, Gaby and James at this difficult time. We hope that the future brings only joyous occasions for our families to share with each other.

“ I have to echo what Alan said. I was lucky enough to be taught by Dr Nardi a few years later and he was also one of my main role models at LICH. One of many interactions with Dr Nardi comes to mind in my first few years of residency when I was having a tough time. Dr Nardi noticed this and made a point to particularly focus on me and then took time away from conferences to give me advice on how to excel in our career of Radiology. I have to say I have used his advice to this day and has transformed my career. When he had advice or a funny story, which he had too many to count, it would always just click for me in my mind. He had an amazing way of seeing the reality of a situation and was caring enough to help. He also took the time to give me life advice outside of radiology and even bought me a book from one of his favorite authors, which I have to this day. I know he did the same with some of my co-residents. He is missed.

Peter was someone from our school days you couldn't forget. And that's because he came from a very special family. Prayers for his family and friends.

“ *I will never forget sweating under Dr. Nardi's watchful eye as he probed me to make a diagnosis from a stack of CT images printed on film... it was a unique experience, one that I will always be grateful for. Beyond the reading and conference rooms, Dr. Nardi also became a friend. He guided me in some of my first publications; he and his family took in our dog, Luna, when we flew back to visit our own families on the west coast; and he always maintained an interest in my future success. I was fortunate to know him as a teacher and for a time as a Brooklyn neighbor. Most days I still come across a scan that has a diagnosis that he taught me about, and I think of him fondly. I know that he has shaped the lives and careers of many of his trainees, and for that we will always be thankful. He will be sorely missed. Our thoughts and prayers are with his family.*

“ *Dr. Nardi was a great mentor and role model for myself and so many he trained at Long Island College Hospital. He taught me so much besides radiology. He shared many personal stories at work, both touching and hilarious, that really showed us his humanity. I remember him telling me about the letters he wrote to his children for when this time would come. I am so glad he had many years after that to live and love. My sincerest condolences.*
